

IN THE SPECIFICATION:

Please replace the paragraph beginning at page 11, line 13, with the following amended paragraph:

As will be understood from the following description, this selective ability allows the marketplace to handle numerous different products simultaneously. If three different products are offered for ~~[[ale]]~~ sale, the interested buyer selects those she wishes to purchase by simply identifying the sellers of those products, only, as those with whom she is willing to pair. Also, the matcher can be run on only certain products at one time, simplifying the overall matching problem.

Please replace the paragraph beginning at page 19, line 5, with the following amended paragraph:

Figure 5 shows, in table form, the same information. On the left side, each row indicates the reserve prices that the buyer is willing to pay with respect to each ~~buyer~~ seller. For example, buyer A is willing to pay \$60 to buy from seller 2, and \$58 to buy from seller 3. The right side of the table indicates the reserve prices for the sellers. For example, seller 4 is willing to sell to buyer A for \$31, and buyer C for \$33.
